Subject:

Questions for Possible Medical Event Notification

(NOTE: This will be used as the Documents Title in ADAMS)

Mr. Smith called to inquire about a possible medical event. Specifically, whether the issue qualified as a medical event or if the issue was reportable under 35.40 or 35.41.

He explained that 10 days ago an authorized user came to him and explained that during a follow-up procedure it was determined the wrong lobe of the liver had been treated during the initial procedure. This was discovered when the authorized user determined the other lobe of the liver needed to be treated as well.

I told him to write down exactly what he relayed to me and we would determine if follow-up and/or action was necessary on our end. He said he would do so within the next couple of weeks.
