SUBJECT: MILLSTONE POWER STATION – PROBLEM IDENTIFICATION AND
RESOLUTION SAMPLE INSPECTION REPORT 05000336/2016404 AND
05000423/2016404

Dear Mr. Heacock:

On July 14, 2016, the U.S. Nuclear Regulatory Commission (NRC) completed a security-related Problem Identification and Resolution inspection at your Millstone Power Station (Millstone), Units 2 and 3. The inspection covered one or more of the key attributes of the security cornerstone of the NRC's Reactor Oversight Process. The enclosed inspection report documents the inspection results, which were discussed on July 14, 2016, with Ms. Lori Armstrong, Director, Station Recovery, and other members of your staff.

The inspection examined activities conducted under your license as they relate to safety and compliance with the Commission's rules and regulations, and with the conditions of your license. The inspector reviewed selected procedures and records, observed activities, and interviewed station personnel.

Based on the results of this inspection, one finding of very low safety significance (Green) was identified. This finding was also determined to be a violation of NRC requirements. However, because of its very low safety significance and because it was entered into your corrective action program, the NRC is treating this finding as a non-cited violation (NCV) consistent with Section 2.3.2 of the NRC Enforcement Policy.

If you contest any NCV in this report, you should provide a written response within 30 days of the date of this inspection report, with the basis for your denial, to the Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington D.C. 20555-0001; with copies to the Regional Administrator, Region I; the Director, Office of Enforcement; and the NRC Senior Resident Inspector at Millstone. In addition, if you disagree with the cross-cutting aspect assigned to this finding, you should provide a written response within 30 days of the date of this inspection report, with the basis for your disagreement, to the Regional Administrator, Region I, and the NRC Senior Resident Inspector at Millstone.

Enclosure contains Sensitive Unclassified
Non-Safeguards Information. When
