RE: Docket No.: 030-32290
License No.: 11-27346-01
Control No.: 590849

Dear Ms. Simmons:

In reference to your email dated July 15, 2016, please note the following information.

We commit to following the "Yttrium-90 Microsphere Brachytherapy Sources and Devices TheraSphere® and SIR-Spheres® Licensing Guidance" dated February 2016 in its entirety.

Dr. Stephen Preece completed Yttrium-90 SIR-Spheres® clinical cases under the supervision of Dr. Suhocki on 7/11/2013, 3/12/2014, and 6/17/2014.

Additionally, in response to items regarding the recent inspection (7/15/16) at Eastern Idaho Regional Medical Center by Janine Katanic please correct/note the following in our license.

The cancer center where our Ir-192 afterloader source is used is located at 3234 Channing way rather than our 3100 Channing way address. Please add 3234 Channing way as location of use. The 3234 Channing way address corresponds to the facility diagram submitted with our original Ir-192 afterloader amendment.

The Ir-192 HDR source is received in our nuclear medicine hot lab at 3100 Channing Way. After completing the necessary package receipt surveys the Ir-192 source is moved to 3234 Channing Way for storage and use in the afterloader unit.

Please contact Todd B. Russell, Director of Imaging & Radiation Oncology (208-227-2602) or our consulting physicist, Adam Arndt, at 800-321-2207, if you require additional information.

Sincerely,

Doug Crabtree
Chief Executive Officer
