				paragraph unless it is accounted for under the limits of paragraph (a)(1) of this section; or (3) No more than 7 kg (15.4 lb) of uranium, removed during the treatment of drinking water, at any one time. A person may not remove more than 70 kg (154 lb) of uranium from drinking water during a calendar year under this paragraph; or (4) No more than 7 kg (15.4 lb) of uranium and thorium at laboratories for the purpose of determining the concentration of uranium and thorium contained within the material being analyzed at any one time. A person authorized to possess, use, and transfer source material under this paragraph may not receive more than a total of 70 kg (154 lb) of source material in any one calendar year.				
N/A	N/A	§ 40.22(b)	B	Section 40.22, paragraph (b) is revised to read as follows: Any person who receives, possesses, uses, or transfers source material in accordance with the general license in paragraph (a) of this section:	N/A	N/A	2013-2	Responsibility of DSHS
N/A	N/A	§40.22(b)(1) – (3)	B	Section 40.22, paragraph (b)(1) through (b)(3) are added as follows: (1) Is prohibited from administering source material, or the radiation therefrom, either externally or internally, to human beings except as may be authorized by the NRC in a specific license. (2) Shall not abandon such source material. Source material may be disposed of as follows: (i) A cumulative total of 0.5 kg (1.1 lb) of source material in a solid, non-dispersible form may be transferred each calendar year, by a person authorized to receive, possess, use, and transfer source material under this general license to persons receiving the material for permanent disposal. The recipient of source material transferred under the provisions of this paragraph is exempt from the requirements to obtain a license under this part to the extent the source material is permanently disposed. This provision does not apply to any person who is in possession of source material under a specific license issued under this chapter; or (ii) In accordance with § 20.2001 of this chapter. (3) Is subject to the provisions in §§40.1 through 40.10, 40.41(a) through (e), 40.46, 40.51, 40.56,	N/A	N/A	2013-2	Responsibility of DSHS

				(8) Procurement or fabrication of components or portions of the proposed facility occurring at other than the final, in- place location at the facility; or Taking any other action which has no reasonable nexus to radiological health and safety.				
§336.607(3), refers to §37.9020, rules for trust funds are in 30 TAC §37.201	607(3): Criteria for License Termination under Restricted Conditions.	§20.1403(c)(1)	C	In § 20.1403, paragraph (c)(1) is revised to read as follows: Funds placed into a trust segregated from the licensee's assets and outside the licensee's administrative control, and inwhich the adequacy of the trust funds is to be assessed based on an assumed annual 1 percent realrate of return on investment;	Y	Y	2011-1	TCEQ rules for trust funds assure the adequacy of the trust fund through other mechanisms than a specified real rate of return on investment (see 30 TAC §37.201) which achieve the same objective as the NRC rule, thus satisfying compatibility category C. 30 TAC §336.607(3) also references Subchapter T of 30 TAC §37 for low level radioactive waste (LLRW) disposal sites. However, 10 CFR §20.1403(c)(3) applies to the LLRW disposal site since the U.S. Department of Energy will take ownership of the federal disposal site and the State of Texas will take ownership of the Compact disposal site.
§336.607(3), refers to §37.9020	607(3): Criteria for License Termination under Restricted Conditions.	§20.1403(c)(2)	C	In §20.1403, paragraph (c)(2) is removed: (c)(2) Surety method, insurance, or other guarantee method as described in §30.35(f)(2) of this chapter; [paragraph (c)(3) is redesignated as paragraph (c)(2), and paragraph (c)(4) is redesignated as paragraph (c)(3)]	Y	Y	2011-1	To be compatible at Category C with this rule, the TCEQ does not need to remove the surety method, insurance, or other guarantee methods for financial assurance from its

TCEQ Radioactive Substance Rule Update Crosswalk

Change to TCEQ Section	Title	NRC Section	Compatibility Category	Summary of Change	Differences Yes/No	Significant Yes/No	RATS ID	If Difference, Why or Why Not Was a Comment Generated
								rule. The rulemaking announcement in the Federal Register (76 FR 3512, June 17, 2011, page 35523) for RATS 2011-1 stated that these methods were removed because they were rarely used by the licensees and because of their relative risk in bankruptcy. The relative bankruptcy risk is mitigated by the TCEQ through the establishment of the Environmental Radiation and Perpetual Care Account, which is described in Texas Health and Safety Code, §401.306. Also, please note that TCEQ does not have any current licensees terminated under restricted conditions.
§336.607(3), refers to §37.9020	607(3): Criteria for License Termination under Restricted Conditions.	§20.1404(a) (5)	C	In § 20.1404, paragraph (a) (5) is added to read as follows: Has provided sufficient financial assurance in the form of a trust fund to enable an independent third party, including a governmental custodian of a site, to assume and carry out responsibilities for any necessary control and maintenance of the site.	Y	Y	2011-1	Change in rule corresponds to change in rule §20.1403(c)(2) (only trust fund allowed as financial assurance instrument). Please see comment for §20.1403(c)(2).
§336.356	Soil and Vegetation Contamination Limits	§20.1406(c)	C	In § 20.1406, paragraph (c) is added to read as follows: Licensees shall, to the extent practical, conduct operations to minimize the introduction of residual radioactivity into the site, including the subsurface, in accordance with the existing radiation protection requirements in Subpart B and radiological criteria for license termination in Subpart E of this part.	Y	N	2011-1	The TCEQ rule, as currently written, meets the essential objective of the NRC rule change, thus meeting Compatibility Category C. The rule

				<p>tailings reclamation, and evaluates alternatives for mitigating these impacts. The plan must include a signed original of the financial instrument obtained to satisfy the surety arrangement requirements of this criterion (unless a previously submitted and approved financial instrument continues to cover the cost estimate for decommissioning). The surety arrangement must also cover the cost estimate and the payment of the charge for long-term surveillance and control required by Criterion 10 of this section.</p> <p>(d) To avoid unnecessary duplication and expense, the Commission may accept financial sureties that have been consolidated with financial or surety arrangements established to meet requirements of other Federal or state agencies and/or local governing bodies for decommissioning, decontamination, reclamation, and long-term site surveillance and control, provided such arrangements are considered adequate to satisfy these requirements and that the portion of the surety which covers the decommissioning and reclamation of the mill, mill tailings site and associated areas, and the long-term funding charge is clearly identified and committed for use in accomplishing these activities.</p> <p>(e) The licensee's surety mechanism will be reviewed annually by the Commission to assure, that sufficient funds would be available for completion of the reclamation plan if the work had to be performed by an independent contractor.</p> <p>(f) The amount of surety liability should be adjusted to recognize any increases or decreases resulting from:</p> <ol style="list-style-type: none"> (1) Inflation; (2) Changes in engineering plans; (3) Activities performed; (4) Spills, leakage or migration of radioactive material producing additional contamination in onsite subsurface material that must be remediated to meet applicable remediation criteria; (5) Waste inventory increasing above the amount previously estimated; (6) Waste disposal costs increasing above the amount previously estimated; (7) Facility modifications; (8) Changes in authorized possession limits; 				

TCEQ Radioactive Substance Rule Update Crosswalk

Change to TCEQ Section	Title	NRC Section	Compatibility Category	Summary of Change	Differences Yes/No	Significant Yes/No	RATS ID	If Difference, Why or Why Not Was a Comment Generated
				<p>(9) Actual remediation costs that exceed the previous cost estimate;</p> <p>(10) Onsite disposal; and</p> <p>(11) Any other conditions affecting costs.</p> <p>(g) Regardless of whether reclamation is phased through the life of the operation or takes place at the end of operations, an appropriate portion of surety liability must be retained until final compliance with the reclamation plan is determined.</p> <p>The appropriate portion of surety liability retained until final compliance with the reclamation plan is determined will be at least sufficient at all times to cover the costs of decommissioning and reclamation of the areas that are expected to be disturbed before the next license renewal. The term of the surety mechanism must be open ended, unless it can be demonstrated that another arrangement would provide an equivalent level of assurance.</p> <p>This assurance would be provided with a surety instrument which is written for a specified time (e.g., 5 years) and which must be automatically renewed unless the surety notifies the beneficiary (the Commission or the State regulatory agency) and the principal (the licensee) with reasonable time (e.g., 90 days) before the renewal date of their intention not to renew. In such a situation the surety requirement still exists and the licensee would be required to submit an acceptable replacement surety within a brief time to allow at least 60 days for the regulatory agency to collect.</p> <p>(i) Proof of forfeiture must not be necessary to collect the surety. In the event that the licensee cannot provide an acceptable replacement surety within the required time, the surety shall be automatically collected before its expiration. The surety instrument must provide for collection of the full face amount immediately on demand without reduction for any reason, except for trustee fees and expenses provided for in a trust agreement, and that the surety will not refuse to make full payment. The conditions described previously would have to be clearly stated on any surety instrument which is not open-ended, and must be agreed to by all parties. Financial surety arrangements generally acceptable to the Commission are:</p>

				(1) Trust funds; (2) Surety bonds; (3) Irrevocable letters of credit; and Combinations of the financial surety arrangements or other types of arrangements as may be approved by the Commission. If a trust is not used, then a standby trust must be set up to receive funds in the event the Commission or State regulatory agency exercises its right to collect the surety. The surety arrangement and the surety or trustee, as applicable, must be acceptable to the Commission. Self insurance, or any arrangement which essentially constitutes self insurance (e.g., a contract with a State or Federal agency), will not satisfy the surety requirement because this provides no additional assurance other than that which already exists through license requirements.
