Subject: Fort Calhoun Station Intent to Comply with American Society of Mechanical Engineers (ASME) Code Case N-729-1, "Alternative Examination Requirements for PWR [Pressurized-Water Reactor] Reactor Vessel Upper Heads With Nozzles Having Pressure-Retaining Partial-Penetration Welds Section XI, Division 1," as written

Reference 1 documented the NRCs approval of relief from certain requirements of ASME Code Case N-729-1 for the Fort Calhoun Station (FCS). Reference 2 documents Omaha Public Power District's (OPPD's) decision to cease power operations at FCS. Following the decision to cease operations, OPPD has determined that in compliance with ASME Code Case N-729-1 and as the station will not be refueling FCS, no further Reactor Vessel Head inspections will be conducted by the station.
