Licensee: Stamford Hospital  
License No. 06-06697-02  
Docket No. 03001265  
Mail Control No. 591045

Dear Ms. Bull,

In order to complete the amendment to your license requested for changes in authorized users/physicists, we need the following additional information:

1. The request for both Drs. Lazarra and Noga is confusing. Both physicians appear to be radiologist; however, the training documented applies to radiation oncology. Please refer to the guidance for microsphere training found at <http://www.nrc.gov/docs/ML1535/ML15350A099.pdf>. For instance, if the physicians are ABR board certified radiologists with subspecialty board certificates for interventional radiology; please submit this information. In addition, the preceptor signing both forms is not currently listed on the Stamford license as an Authorized User. Please explain. Finally, Pathway 2 training was documented; which normally is training documented by the manufacturer. Is Dr. Stainken a manufacturer representative? If not, then please clarify why Pathway 1 was not followed and include a due date for completion of in-vivo cases by both doctors. If in-vivo cases were completed under Dr. Stainken's authorization, please submit documentation to reflect.
2. With regard to your addition of Mr. Masino, please re-submit from 313A (AMP) with the following additional information, signed by the preceptor – include AMP's name on Page 1 and the dates of the training on Page 3.

The shielding evaluation for the new room is under review. I will contact you with any additional questions. You may submit the above requested information either via a signed pdf to my email or via fax to 610-337-5269. Thank you for your assistance,

Penny Lanzisera
