Good Morning

Celimar

Can you please enter this letter document into Adams to support GL-704325 Independence Coal Co., NRC key #'s 591827 & 591903. These two devices will be marked "Never Possessed Device" according to the documentation listed.

If you should have questions or concerns please don't hesitate to give me a call at 240-753-0186.

Thanks Angie

Angie

I would like to send the termination documents for the Independence Coal, GL-704325-20 but need to confirm that the remaining device listed in section six is not correctly listed on this license. I have contacted Thermo Fisher on the location of device serial #M461 and based on the attached e-mail would like for the NRC to research the history of this device. At this time we are unable to confirm this device was ever possessed at this location.

William G. Newsome

Hello William,

Based on the information I was able to find in our system, it looks as though we sold a Model:9277 SN:M461(Fe-55:45mCi),(Cd-109:4mCi) to Industrial Alloy Fabricators on 2/4/98. From the looks of it, they owned a previous Model 9277 SN:M461, but this one had a 5mCi Cd-109 source. They disposed of this device 1/29/98 and were shipped their current device on 2/4/98. I have included the device information below. I have also added the contact information for Industrial Alloy Fabricators. Please keep in mind that these records are rather dated and therefore cannot say the information is 100% accurate. The customer information may be outdated or the device may have moved on or been disposed. However it does provide a reference point. Hopefully this information is useful to you. If anything else comes up, please do not hesitate to ask.
