**Attachments:** RE: NextEra/NRC public meeting ?? [2016-SST-0548]

Good afternoon Debbie!

Thank you for your email, and we appreciate your questions. I believe the attached email is responsive to your query. As I stated below in my August 11, 2016 email and is echoed by Fred Bower in the attached email to you, the NRC did not generate a "list of questions" to ask NextEra during the June 15, 2016 public meeting. The NRC staff spontaneously and informally asked questions as NextEra gave its presentation; as such there is no list available to send to you in such regard. Fred's attached email also provides information on the associated ADAMS ML #s associated with this and your other concerns.

I also would like to remind you that technical correspondence (e.g., audit reports, requests for additional information, safety evaluation and non-proprietary information submitted by NextEra) between the NRC/NRR staff and NextEra during the staff's review of the NextEra license amendment request will be available to the public, and verbal communication of a technical nature is transparently conducted through a public meeting.

Thank you,

Angie

sorry SEND me the list of questions requested to NextEra.

Debbie

Hello Angie and Fred,

To be clear. Below is the purpose of the June 15 2016 NextEra and NRC Cat 1 meeting in the NRC notice.

"The purpose of this meeting is for NextEra Energy to present to the NRC staff its plan for a license amendment request regarding revising the licensing basis for Alkali-Silica Reaction at the Seabrook Station, Unit No. 1. "

Below is the copy of the NRC letter on page 2. It states what the NRC requested questions to NextEra to answer to the NRC. . I asked you to see me the list of NRC questions your NRC staff asked NextEra staff to answer. I have requested that you send C-10 the list of NRC questions. We also want the NextEra answers to your questions when you receive them

**Thank you,**

**Debbie**

I forwarded your previous email to Fred Bower so that he can consider whether to include a formal response to this question in the letter he is planning to send you responding to all of your other questions, but the short answer is: I don't have knowledge that the NRC had a "list" of questions. NextEra was presenting, and the NRC participants peppered the applicant with clarifying questions during and after they presented their slides (see the "public meetings" section on the Seabrook ASR Public Webpage <http://www.nrc.gov/reactors/operating/ops-experience/concrete-degradation.html#mtgs>.) If you want to be ensured to have the specifics of any public meeting, we encourage you to call in to public meetings – we always give notice and a way to observe – and that ensures that you are privy to the specifics of public meetings that are not transcribed.

I will forward the email below, as you corrected it, to Fred Bower since he has NRC Oversight of Seabrook. Also, I plan to continue to allow your questions to be responded to by the NRC through the proper channel of the Region I Office since they oversee Seabrook, and I provide them engineering support from Headquarters.

Thank you!

Angie
