SUBJECT: NRC CONSENT TO DIRECT LICENSE TRANSFER AND AMENDMENT NO. 03

Dear Ms. Bentley:

By letter dated June 17, 2016 (ML16172A041), Inspecsol Engineering Inc. (Inspecsol) submitted to the U.S. Nuclear Regulatory Commission (NRC) a Request for Consent to direct License Transfer of NRC Materials License No. 21-32548-01. Based on the information provided by Scott J. Adamowski, Vice President, Inspecsol and GHD Services Inc., we understand that as a merger of the parent company to Inspecsol Engineering Inc., control of the licensed operation from Inspecsol was directly transferred to GHD Services Inc. We further understand that this transfer will not result in any change to the licensed materials, location of use of licensed material, or persons responsible for the licensee's radiation safety program. Based on information provided Mr. Adamowski in that letter and in a subsequent June 28, 2016 letter (ML16180A095), we understand that, in July 2014, all of Inspecsol's assets and operations were directly transferred to GHD Services Inc. We have updated the license accordingly.

Enclosed is Amendment No. 03 to your NRC Material License No. 21-32548-01 in accordance with your letters dated June 17 and 28, 2016, confirming that the transaction has been completed as described in those letters. Please note that, as discussed via phone, we have also updated Items 7.A and 7.B. to specifically list the sealed sources authorized in the Sealed Source and Device registry for use in the Troxler Electronic Laboratories Model 3400 Series portable gauging devices authorized for use under your license.

Please also note that we have updated Condition Nos. 10, 13, and 15 in accordance with current NRC standard licensing conditions. We have deleted Condition No. 19 as it is not applicable to devices authorized for use by your license. We have also deleted Condition No. 20 in accordance with current NRC policy to include the reference to Title 10 of the *Code of Federal Regulations*, Part 71, "Packaging and Transportation of Radioactive Material," in the preamble, on page 1 of the license. We have also added NRC's Agencywide Documents Access and Management System (ADAMS) document accession numbers to the documents referenced in Condition No. 20 to the amended license.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

Enclosure 2 to this document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

R. Bentley

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Based on the above understandings and as more fully detailed in the enclosed NRC staff's Safety Evaluation Report which documents the NRC staff's review of the request, we have no objection to the proposed transfer. Please contact me at (630) 829-9892, or by e-mail at sara.forster@nrc.gov if you have any questions regarding this letter.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Sara A. Forster, M.S.
