

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
REGION III  
2443 WARRENVILLE RD. SUITE 210  
LISLE, IL 60532-4352

AUG 22 2016

Jeff Stephens  
Radiation Safety Officer  
Emery Sapp & Sons, Inc.  
2301 I-70 Drive NW  
Columbia, MO 65202

Dear Mr. Stephens:

Enclosed is Amendment No. 01 to your NRC Material License No. 24-32751-01 in accordance with your request. Please note that, based on our new licensing process the format of your license has been changed. In addition, we deleted License Condition 13 regarding the decommissioning financial assurance requirement from your license because it did not apply to your program. Also, we deleted License Condition 20 regarding the requirement for transporting licensed material because the requirement is already covered under 10 CFR Part 71.

Mr. Kyle Frye, Quality Control Manager, requested to be listed as the main Radiation Safety Officer (RSO) on your license. We requested additional information regarding the delegation of authority for the RSO signed by the licensee senior management; however, we have not received a response. Therefore, we did not list him as the RSO on the license. Please note that our policy is to list only one RSO on the license. This action is without prejudice to resubmission.

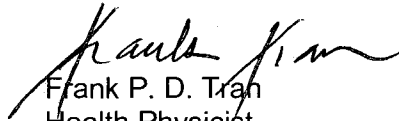

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

  
Frank P. D. Tran  
Health Physicist  
Materials Licensing Branch
