Hi Anders,

Thank you for arranging for the goto meeting, that is helpful for many of our participants.

I do not think we will need the full day for presentations; I would anticipate we could be done by 2 pm.

I am attaching our comments on the defense in depth write up, as well as our proposed markup of the RG to address aggregation. We will be happy to discuss these on 9/1 as well.

Subject: RE: RE: RG 1.174, Rev. 3 - Latest Draft Revision of Defense-in-Depth Guidance

Victoria,

I have announced the next public meeting on RG 1.174, Revision 3, (see URL address below) for September 1, 2016. To have the NEI presentation materials entered into ADAMS and attached to the public meeting announcement in advance of the meeting date, please send your presentation files to me via email no later than 8/26/16. If the presentation materials are received later than 8/26/16, there may be insufficient time to have them attached to the public meeting announcement before the meeting date. I have arranged for a GoTo Meeting in case the meeting materials are not posted in time for the meeting.

<http://meetings.nrc.gov/pmns/mtg?do=details&Code=20161061>

I have scheduled this meeting from 9AM to 4PM and the meeting is primarily for industry to present on the proposed example; however, if I know in advance that we will not need the entire

day for stakeholder presentations, I would like to abbreviate the meeting accordingly so as not to unnecessarily occupy peoples' schedules. As such, can you please let me know much time you anticipate needing for the NEI presentation?

Thank you.

No problem.

We can provide input by August 8.

We can support a September 1 meeting.

Subject: RG 1.174, Rev. 3 - Latest Draft Revision of Defense-in-Depth Guidance

Victoria,

Attached is the Microsoft Word version of the draft language on the types of licensee-initiated licensing basis changes. Also, as you may have already discovered, I accidentally switched the two the ADAMS accession numbers I provided in my earlier email with respect to the indicated documents.

- ML16209A221 is for the latest revised draft of the defense-in-depth guidance in Section 2.1 of DG-1285
- ML16209A220 is for the draft language on the types of licensee-initiated licensing basis changes.

My apologies for creating any confusion.

Subject: RG 1.174, Rev. 3 - Latest Version of Word version of DID white paper
Importance: High

Victoria,

I wanted to let you know that the latest draft revision of the defense-in-depth guidance is now publicly available under the NRC Agencywide Document and Access System accession number **ML16209A220** (see the attached file for the Microsoft Word version of the publicly available document). Unfortunately, the RG 1.174 Working Group (WG) needed additional time to discuss and make changes which is why I was not able to make it available early last week. In addition to the revisions to the defense-in-depth guidance, a second document was made publicly available (see ADAMS accession number **ML16209A221**), which contains draft language that is intended to address stakeholder comments on the types of licensee-initiated licensing basis changes (e.g., temporary versus permanent plant configurations). We have not yet decided on exactly where in DG-1285 this draft language should reside, but wanted to at least share what we had developed. Can you please let me know if you still expect to be able to provide comments to the NRC by August 8?

Also, I would like to invite industry to give a presentation at the next public meeting for RG 1.174, Revision 3, on the industry-proposed example(s) that you indicated would be ready to share with the NRC by late-August. I am in the process of organizing this public meeting and would like to schedule it as a full-day meeting on 8/30, 8/31, or 9/1. As such, can you please let me know as soon as possible which of those three dates works best?

Thank you.

Victoria,

My apologies for not getting this to you sooner. Please see the attached file for the Microsoft Word version of the DID white paper that was discussed during the 7/7/16 public meeting on RG 1.174, Revision 3. Related to this, I wanted to let you know that the RG 1.174 Working Group will be meeting this afternoon to make further revisions to the latest version of this guidance, with consideration of the verbal feedback we received during the 7/7/16 public meeting. I expect to make this newly revised version publicly available by early next week, if not by late this week, for public review. Our intent is to make sure that the public has the latest version of our work so that we are not out of sync with our revision efforts and public review of our work product.

Also, can you please provide a specific date in early-August when you anticipate sending in the latest round of industry comments?

Thank you.

Hi Anders,

As discussed during our meeting last week, it may be helpful to us to have a word version of the DID white paper to provide more complete comments. Would it be possible for us to get this?
