SUBJECT: NON-PUBLIC SECURITY INSPECTION PLAN FOR FORT CALHOUN  
STATION (NRC PHYSICAL SECURITY INSPECTION REPORT  
NUMBER 05000285/2016401)

Dear Mr. Marik:

On August 11, 2016, the U.S. Nuclear Regulatory Commission (NRC) completed its mid-cycle performance review of Fort Calhoun Station. The results of that review have been transmitted to you separately in a publicly available assessment letter. This letter informs you of the NRC's plans for future security-related inspections at your facility.

The enclosed inspection plan lists the security-related inspections scheduled through June 30, 2018. The inspections listed during the last nine months of the inspection plan are tentative and may be revised at the next semiannual performance review. The NRC provides the inspection plan to allow for the resolution of any scheduling conflicts and personnel availability issues. The NRC will contact you as soon as possible to discuss changes to the inspection plan should circumstances warrant any changes.

While we are fully committed to our goal of ensuring openness in our regulatory process, we must balance that goal with the more immediate need of ensuring the continued safety and secure operation of nuclear facilities and the protection of nuclear materials in our country. Thus due to the security-related information contained in this correspondence, and in accordance with NRC Policy For Handling, Marking and Protecting Sensitive Unclassified Non-Safeguards Information, a copy of this letter and its enclosure will not be available for
