

***NRO Presentation on IP 43006  
for  
Public Meeting with NEI  
on  
August 25, 2016***

# **Implementation of Mitigating Strategies Related to the inspection of the NSRC**

Jose G Jimenez

Division of Construction Inspection

Office of New Reactors

---

Japan Lessons Learned

# Agenda

- Purpose of Inspection Procedure (IP) 43006
- Discussion of recent revision to the IP
- Path Forward
- NEI's Presentation

## **IP 43006 - Purpose**

- JLD and the industry discussed best way to verify implementation of the Phase 3 - NSRC
- Two redundant NSRC:
  - Phoenix, AZ, and Memphis, TN
  - Two redundant Command and Control Centers
- Inspection Procedures are guidance for the staff not regulatory requirements
- IP informed by quality assurance programs and lessons learned from vendor inspections
- Scope is to provide reasonable assurance that the NSRC will comply with Phase 3 commitments

- Comments received from the industry:
  - Too similar to 10 CFR 50 Appendix B requirements
  - Language seems to implement new requirements
  - Dissimilar from the audit conducted by JLD
  - Clarification on inspection logistics
  - Calibration requirements

# Path Forward

- Revise IP 43006 based on the results from this meeting
- Issue revised IP
- Conduct first pilot inspection
- Revise IP based on lessons learned from the procedure
- Conduct inspection of the second NSRC
- Implement tri-annual inspection schedule

# Questions and Discussion
