Attention: Document Control Desk
Mark Lombard, Director
Division of Spent Fuel Storage and Transportation,
Office of Nuclear Material Safety and Safeguards
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555-0001

Dear Mark Lombard:

The U.S. Department of Energy (DOE) requests an amendment of U. S. Nuclear Regulatory Commission Certificate of Compliance (CoC) Number 9330, Revision 9, for the Model ATR-FFSC package (NRC Docket 71-9330) to authorize the use of Revision 8 until December 31, 2016.

This administrative change is necessary to allow loading operations in-progress under Revision 8 to complete, and will allow sufficient time for registered users to revise their operating procedures to implement the changes authorized (i.e., content amendment) in Revision 9 of the CoC. Specifically, DOE requests the following changes/additions to Revision 9 of the CoC.

- Revision 8 of this certificate may be used until December 31, 2016.
- Revision 9 of this certificate may be used until May 31, 2019.

If you have any questions or need more details please call at 301-903-5513 or james.shuler@em.doe.gov.

A handwritten signature in blue ink that reads "James M. Shuler".

James M. Shuler
