Subject: NRC Request for Additional Information for Schneider Regional Medical Center (Mail Control Number 591171)
Date: Monday, August 22, 2016 3:12:00 PM

Licensee: Schneider Regional Medical Center
License No: 55-17986-01
Docket No: 030-13764
Control No: 591171

Dear Mr. Wheatley,

Could you please reply back to confirm receipt?

I have the additional information you submitted on August 8, 2016 to support your request to amend Nuclear Regulatory Commission License No. 55-17986-01. I have everything I need to issue the amendment.

However, I do need additional information regarding 10 CFR 35.400 possession limits. Our licensing system has recently changed to Web Based Licensing, and you will notice that it will have a different format when you receive your amendment. 10 CFR 35.400 sources will no longer be listed under License Condition 12. They will be listed under Licensed Material Items 6, 7, and 8. Rather than have a 4 Ci limit total, can you please let me know the maximum possession limit requested for Iodine-125, the maximum possession limit requested for Palladium-103, and the maximum possession limit requested for Cesium-131?

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities."

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov<<http://www.nrc.gov>>; select Nuclear Materials; Med, Ind, & Academic Uses; then Licensee Toolkits, see our toolkit index page. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

You may respond to my attention in writing by letter, email (if letter is signed by senior management and scanned into a pdf format), or fax (610-337-5269), referencing mail control number 591171. If you could please reply by September 5, 2016, it would be greatly appreciated.

Thank you in advance for your assistance.

Jan
