Hi Laurie,

Thanks for the map with coordinates. I agree that the project will not impact bog turtle, Indiana bat, and northern long-eared bat. I'll send you a letter of concurrence.

Have a good weekend.

Jeremy

Hi Jeremy,

It was great speaking with you today regarding this project. I hope you find this information helpful.

According to the Picatinny Arsenal RSO, there will be no tree clearing activities as part of this project. The closest wetlands area is on the other side of the road from our area of concern; the Picatinny Garrison Environmental Office has determined there will be no wetlands impact from these activities.

Please let me know if the attached coordinates are helpful or not. If not, I'll work with the RSO to provide you the format you need.

Hi Laurie,

I wasn't able to open the work plan with attachments on the ADAMS system. Attached is the error message.

Question - Can you send me the coordinates of the action area? I can't seem to find the exact project location. Also, please confirm with me that no tree clearing activities will occur? Lastly, is the project going to impact any wetlands or occur near any wetlands?

Thanks,

Jeremy

Jeremy – the attached documents are the Army's letters to the NRC in support of the project.

The work plan w/attachments is too big. The NRC's Agencywide Document and Management System (ADAMS) Accession Number for this document is ML14205A271.

To obtain the document, click on this hyperlink <http://www.nrc.gov/reading-rm/adams.html>

Then Open “**Begin Web-Based ADAMS Search**”.

- Click on the **Content Search Tab**
 - o In Document Properties click in space under “**Property**” and select “**Accession Number**” from drop down menu.
 - o Then click space under “**Operator**” and select “**is equal to**” from drop down menu.
 - o Then click space under “**Value**” and then enter “**ML14205A271**”.
 - o Then click the **Search** button.

Please let me know if you or your colleagues need any assistance in accessing this document.
