Subject: Questions on vendor training for GammaMed plus and Brachyvision
Date: Wednesday, August 31, 2016 4:09:00 PM

Dear Mr. Piccolo,

A client of yours in Puerto Rico recently completed vendor training and I was hoping you could clarify a few items regarding the training provided:

1. The Varian vendor representative was Homero Lavieri Martins. Can you confirm that he is a representative of Varian and is qualified to provide training to authorized users and physicists on the GammaMed plus HDR and BrachyVision software?
2. Several items on the Varian checklist for BrachyVision V11 were marked as not applicable since the PR licensee will use the Eclipse treatment planning software. For instance the entire Session 3, 4, 8, 9, 10, 11; most of Session 13; and the first 3 sections of Session 6 were marked as not applicable. Can you confirm if this is acceptable or is there another checklist that should have been provided for Eclipse users?

Thank you for your assistance,

Penny Lanzisera
