MEMORANDUM TO: Mark Tonacci, Chief  
Licensing Branch 1  
Division of New Reactor Licensing  
Office of New Reactors

FROM: Rani Franovich, Senior Project Manager */RA/*  
Licensing Branch 1  
Division of New Reactor Licensing  
Office of New Reactors

SUBJECT: MEETING SUMMARY OF CLOSED MEETING WITH NUSCALE  
POWER, LLC TO DISCUSS NUSCALE'S DRAFT TOPICAL  
REPORT ON SUB-CHANNEL ANALYSIS METHODOLOGY  
(TAC# RN6304)

On August 22, 2016, representatives of the U.S. Nuclear Regulatory Commission (NRC) staff and NuScale Power, LLC (NuScale) held a closed meeting at the NuScale office located at 11333 Woodglen Avenue, Suite 205, Rockville, Maryland, 20852. The purpose of the meeting was for the NRC staff to review the draft sub-channel analysis methodology topical report (TR), ask questions, seek clarification, and confirm its understanding of the technical content. The NRC staff also asked how other TRs involving critical heat flux and non-loss-of-coolant accident methods complement the information provided in the sub-channel analysis methodology TR, and how the TR will be applied to the Nuscale design certification application. The applicant plans to formally submit its application in December 2016.

During the course of the meeting, the NRC staff suggested that requests for additional information could be precluded or minimized if the TR is enhanced in the following areas:

- level of information regarding transients or conditions,
- ranges of applicability in summary tables,
- clarity of interfaces with other codes,
- missing references to internal or external tests and analyses for parameter values,
- clarity of basis and assumptions for rod bowing penalty, and
- clarity of grid loss coefficients, sensitivity analysis and hot spot location.

No additional items were identified by the NRC staff, and no requests were made by NuScale.
