2:45 – 3:45	NEI Presentation / Discussion	NEI / All
3:45 – 4:00	Meeting Wrap Up	NRC
4:00	Adjourn	

---

# Background

- SRM-SECY-11-0014 directed the staff to clarify defense-in-depth (DID) language in RG 1.174
- The staff issued proposed draft guide DG-1285 in May, 2012
- Completion of effort delayed due to ongoing work related to Fukushima Near-Term Task Force Recommendation 1 and the Risk Management Regulatory Framework
- SRM-SECY-15-0168 directs staff to expeditiously complete the revision to Regulatory Guide 1.174

---

# Scope

- Revising the defense-in-depth guidance in Section 2.1 from DG-1285
- Other scope items:
  - Transitioning from conditional containment failure probability and large release frequency to core damage frequency for new reactors
  - Containment performance expectations for new reactors

---

# Public Interactions

- Maintaining an open dialog with stakeholders:
  - Hold multiple public meetings to obtain stakeholder feedback
  - Conduct public workshop
  - Stakeholders are encouraged to provide comments during guidance revision period

---

# Progress to Date

- External and internal stakeholder feedback has been received on the last draft product
- Feedback is currently under review

---

# Goals for this Meeting

- NRC will have an understanding of the industry-proposed example
