**Subject:** [External\_Sender] Jane Dough Clarification for RAI 3.4-2 and 5.7-7

Dave,

In order to clarify and align the discussions between TR-180 and Section 3.4.6 we have revised Section 3.4.6 to formulas and equations to show how the pressures were derived and a discussion clarifying what pressures will be operated to.

Also, I've attached a revised section of 5.7.8.10.3 – in which a discussion has been added for a third sample. References to controlled excursions has been removed and the discussion taken back to that which was originally submitted.

I still owe you the write up for monitoring precedent and am waiting on Bruce/George to supply.

Thank You
