**SUBJECT: ERRATA FOR MID-CYCLE ASSESSMENT LETTER FOR FORT CALHOUN  
STATION (REPORT 05000285/2016005)**

Dear Mr. Marik:

It was identified that the enclosed inspection plan in a letter to you dated August 31, 2016 (ML16237A038) was improperly marked. The inspection plan contained the markings of "Official Use Only – Sensitive Internal Information/Security-Related Information", however, the inspection plan did not contain information under that category. The inspection plan that was originally placed into ADAMS has been corrected by striking through the markings. The original Mid-Cycle Assessment Letter and the corrected inspection plan are enclosed. Please note that neither the content of the assessment letter, nor the inspection plan has changed.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter, its enclosure, and your response (if any) will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's Agency wide Document Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

*/RA/*

Thomas R. Hipschman, Team Leader  
Inspection Program and Assessment Team  
Division of Reactor Safety

**UNITED STATES  
NUCLEAR REGULATORY COMMISSION**

REGION IV  
1600 E LAMAR BLVD  
ARLINGTON, TX 76011-4511

August 31, 2016

Shane M. Marik, Site Vice President  
and Chief Nuclear Officer  
Omaha Public Power District  
Fort Calhoun Station  
Mail Stop FC-2-4  
9610 Power Lane  
Blair, NE 68008

**SUBJECT: MID-CYCLE ASSESSMENT LETTER FOR FORT CALHOUN STATION  
(REPORT 05000285/2016005)**

Dear Mr. Marik:

On August 11, 2016, the U.S. Nuclear Regulatory Commission (NRC) completed its mid-cycle performance review of the Fort Calhoun Station. The NRC reviewed the most recent quarterly performance indicators (PIs) in addition to inspection results and enforcement actions from July 1, 2015 through June 30, 2016. This letter informs you of the NRC's assessment of your facility during this period and its plans for future inspections at your facility.

The NRC determined that overall, Fort Calhoun Station operated in a manner that preserved public health and safety and met all cornerstone objectives. The NRC determined the performance at Fort Calhoun Station during the most recent quarter was within the Licensee Response Column of the NRC's Reactor Oversight Process (ROP) Action Matrix because all inspection findings had very low (i.e., Green) safety significance, and all PIs indicated that your performance was within the nominal, expected range (i.e., Green). Therefore, the NRC plans to conduct ROP baseline inspections at your facility.

By letter dated June 24, 2016, Omaha Public Power District (OPPD) certified their intention to permanently cease power operations at Fort Calhoun Station by December 31, 2016 (ADAMS Accession No. ML16176A213). Following certification from OPPD that permanent shutdown and permanent fuel removal from the reactor vessel has occurred, the Fort Calhoun Station 10 CFR Part 50 license will no longer authorize plant operation, and the station will transition to NRC decommissioning oversight in accordance with Inspection Manual Chapter 2561, "Decommissioning Power Reactor Inspection Program."

The enclosed inspection plan lists the operating reactor ROP inspections scheduled through June 30, 2018. In consideration of your June 24, 2016, letter, the inspection plan has been adjusted to ensure inspections needed to verify safe operation during the transition to a defueled plant condition are performed. Routine inspections performed by resident inspectors are not included in the inspection plan. The NRC provides the inspection plan to allow for the resolution of any scheduling conflicts and personnel availability issues. The NRC will contact you as soon as possible to discuss changes to the inspection plan should circumstances

**Enclosure 2**

warrant any changes. This inspection plan does not include security related inspections, which will be sent via separate, non-publicly available correspondence.

In response to the accident at Fukushima, the Commission issued Order EA-12-049, "Order Modifying Licenses with Regard to Requirements for Mitigation Strategies for Beyond-Design-Basis External Events," and Order EA-12-051, "Order Modifying Licenses with Regard to Reliable Spent Fuel Pool Instrumentation." The NRC conducted audits of licensee efforts towards compliance with these Orders, and the information gathered will aid staff in development of the ultimate Safety Evaluation for the site. After the NRC staff receives the Final Compliance letter for the site, the Safety Evaluation will be issued. Then, the NRC staff will confirm through inspections the full implementation of the orders mentioned above by performing Temporary Instruction 191, "Inspection of the Implementation of Mitigation Strategies and Spent Fuel Pool Instrumentation Orders and Emergency Preparedness Communication/Staffing/Multi-Unit Dose Assessment Plans."

In Staff Requirements Memorandum – SECY 16-0009, "Recommendations Resulting from the Integrated Prioritization and Re-Baselining of Agency Activities," the Commission approved the NRC staff recommendation to discontinue the formal mid-cycle assessment process beginning in calendar year 2017. This will be the final mid-cycle assessment letter. The staff will continue to conduct quarterly assessment meetings and communicate changes in the assessment of licensee performance in accordance with the guidance in Inspection Manual Chapter 0305, "Operating Reactor Assessment Program."

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Please contact me at 817-200-1173 with any questions you have regarding this letter.

Sincerely,

**/RA/**

Shane M. Marik, Site Vice President  
and Chief Nuclear Officer  
Omaha Public Power District  
Fort Calhoun Station  
Mail Stop FC-2-4  
9610 Power Lane  
Blair, NE 68008

SUBJECT: ERRATA FOR MID-CYCLE ASSESSMENT LETTER FOR FORT CALHOUN STATION  
(REPORT 05000285/2016005)

Dear Mr. Marik:

It was identified that the enclosed inspection plan in a letter to you dated August 31, 2016 (ML16237A038) was improperly marked. The inspection plan contained the markings of "Official Use Only – Sensitive Internal Information/Security-Related Information", however, the inspection plan did not contain information under that category. The inspection plan that was originally placed into ADAMS has been corrected by striking through the markings. The original Mid-Cycle Assessment Letter and the corrected inspection plan are enclosed. Please note that neither the content of the assessment letter, nor the inspection plan has changed.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter, its enclosure, and your response (if any) will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's Agency wide Document Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

*/RA/*

Thomas R. Hipschman, Team Leader  
Inspection Program and Assessment Team  
Division of Reactor Safety

Docket No.: 50-285  
License No.: DPR-40

Enclosures:

1. Fort Calhoun Station Inspection/Activity Plan
2. 2016 Mid-Cycle Assessment Letter (ML16237A038)
