Subject: Oconee Nuclear Station Docket Nos.
50-269, 50-270, 50-287

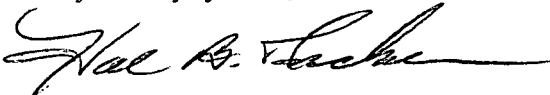

McGuire Nuclear Station Docket Nos.
50-369, 50-370

Dear Mr. Eisenhut:

Our responses of November 4, 1983 to Generic Letter 83-28 described our efforts to comply with the requirements of item 3.1.2. This was the review of vendor engineering recommendations to ensure that any appropriate test guidance is incorporated into station procedures for Reactor Trip Breaker System Components as well as identifying any impact on the technical specifications. This review has been completed for Catawba Nuclear Station; however, the review for McGuire Nuclear Station and Oconee Nuclear Station will not be completed by December 31, 1984 as expected. This process has taken longer than anticipated because Duke has gone beyond the basic requirements of item 3.1.2 and conducted a more complete and thorough investigation. For example, applicable vendor drawings and manuals have also been included in our review. Additionally, to ensure completeness we will be submitting the results of our review directly to the vendors to verify that all recommendations have been identified and to concur with their disposition. This effort is now expected to be complete by March 31, 1985.

Unless otherwise informed by the NRC staff, we will assume this extended date is acceptable.

Very truly yours,

Hal B. Tucker
