and Safeguards

SUBJECT: SUMMARY OF AUGUST 30, 2016, PUBLIC MEETING WITH FUEL
CYCLE INDUSTRY REPRESENTATIVES TO DISCUSS
REPORTING REQUIREMENTS RELATED TO MEDICAL
TREATMENT OF PERSONNEL AND UNPLANNED
CONTAMINATION EVENTS

On August 30, 2016, the U.S. Nuclear Regulatory Commission (NRC) staff held a Category II public meeting with representatives of the Nuclear Energy Institute (NEI), fuel cycle industry, and members of the public. The purpose of the meeting was to discuss the regulatory requirements contained in Title 10 of the *Code of Federal Regulations* (10 CFR) Sections 40.60 and 70.50 regarding the reporting associated with medical treatment of contaminated personnel and unplanned contamination events at fuel cycle facilities. Issues related to these reporting requirements were originally identified via NEI's Regulatory Issue Resolution Protocol process, and were discussed at a preceding May 25, 2016, public meeting. A summary of the May 25, 2016, public meeting is available in the Agencywide Documents Access and Management System (ADAMS) Accession Number ML16158A330.

During the August 30, 2016, meeting, the NRC presented the staff's regulatory position, including discussions on the basis for the reporting requirements. The presentation also included options for resolving the issues, such as the development of a Regulatory Issue Summary to clarify unplanned contamination events and, if desired, the exemption request process to address the medical treatment of contaminated personnel. Industry representatives expressed continued
