REQUEST FOR ADDITIONAL INFORMATION  
CERTIFIED FUEL HANDLER TRAINING PROGRAM  
OMAHA PUBLIC POWER DISTRICT  
FORT CALHOUN STATION, UNIT NO. 1  
DOCKET NO. 50-285

By letter dated July 7, 2016 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML16190A208), Omaha Public Power District submitted a request for approval of the Certified Fuel Handler Training and Retraining Program at Fort Calhoun Station, Unit No. 1 (FCS).

The U.S. Nuclear Regulatory Commission (NRC) staff has reviewed the information provided in the submittal and determined that the additional information discussed below is required in order to complete its formal review of the request.

**RAI-1**

The NRC staff has reviewed Certified Fuel Handler Training Program approval requests for several decommissioning licensees, and those requests include a section titled "Evaluating Changes to the Certified Fuel Handler Training and Retraining Program," which generally states that changes may be made to program elements without NRC approval as long as the following are applicable: (1) suitable proficiency in the performance of the program's activities is maintained; and (2) changes are documented in an accessible manner that will allow the NRC to verify the adequacy of the program in accordance with Section 50.120 of Title 10 of the *Code of Federal Regulations*. The submittal for FCS appears to be missing this section. Please provide a justification for why this section is not included in the submittal, or where the information is located if it is included.
