Subject: Additional Information to Control Number 588168 - Follow-up to Nuclear Regulatory  
Commission (NRC) Request for Additional Information as Related to Licensee Request  
of March 28, 2016 (ML16117A276)

Ref: License #34-00507-16, Docket #030-05626

As requested on August 30, 2016, during the recent NRC Region III inspection of activities at the NASA Glenn Research Center (GRC) cyclotron facility, the GRC is providing the following affirmation statement regarding its March 28, 2016, request to withdraw its decommissioning plan. In this March 28, 2016, letter, the NASA GRC also provided a technical basis for why a decommissioning plan, pursuant to 10 CFR 30.36(g)(1), is not required for work to be performed at its shutdown cyclotron facility, also known as Building 140.

The NASA GRC will notify the NRC of its plans regarding the sequencing of Building 140 demolition and the project's decommissioning licensing action prior to conducting work on the radiologically-impacted portions of the Building 140 structure.

Should additional information be required, please contact Mr. Christopher J. Blasio, Radiation Safety Officer, at (216) 433-6520.

A handwritten signature in black ink, appearing to read "Mark M. Kowaleski".

Mark M. Kowaleski
