Subject: [External_Sender] Joining with Donna Gilmore re comments to public participation.

Dear Mr. Rakovan,

Please accept the following email as my comments and add them to guidances and rulemaking re public participation.

I do not find the NRC very effective at promoting public participation outside of the licenses and their minions. I do praise the young women of the Chair's office and PDRs for their forbearance my complaints.

I am usually in public meetings as the only anti-nuclear attendee.

During the meeting, many statements are made by attendees without stating name or affiliation, despite the admonitions of the facilitator.

Side bars are frequent and without explanation. Same for inaudible stretches.

Many statements are expressed about protecting the health and safety of the public but with the addition of "with or thru NRC rules and regulations."

The new rules seem to reduce or cut off public participation and comment.

Respectfully submitted,

Marvin I. Lewis
