Licensing and Leak Test Data.pdf

Michelle,

In regards to the termination of:

License No. – 33027403-01 Docket No. – 03032405 Control No. - 592848

Please find attached copies of both the Arizona and North Dakota licenses along with leak tests of the nuclear density gauges as requested.

If there is further information needed, please let me know.

Thank you for your assistance in this matter.

Mark Redlin Safety Manager Northern Improvement Co. 701-516-7043

Subject: NRC License Number 33-27403-01 Termination: Deficiency Letter

License No.: 33-27403-01 Docket No.: 03032405 Control No.: 592848

Mr. Redlin,

This letter is in reference to your request dated August 13, 2016. In order to continue our review of your request to terminate your license, we need the following additional information.

In your letter, you indicated that the portable gauges will be transferred to other material licenses. Please submit a copy of both the Arizona and North Dakota Agreement State material license, along with the most recent leak test results for the portable gauges that you intend to transfer to those prospective material licenses.

Please provide this information by <u>September 27, 2016</u>. You may fax your signed response to 817-200-1263, referencing mail control 592848. When you send the fax, you may wish to leave a voicemail or e-mail

message to alert me to look for it. If you are submitting your response by email, the response must be submitted in pdf format. Please send me an e-mail or call me at 817-200-1590 if you have any questions.

Michelle Simmons Health Physicist US NRC 1600 East Lamar Blvd. Arlington, Texas 76011 817-200-1590

# ARIZONA RADIATION REGULATORY AGENCY RADIOACTIVE MATERIAL LICENSE

#### CONDITIONS

- 10. Radioactive material may be used at the licensee's facility located at Item 2 above and at temporary job sites of the licensee throughout the state of Arizona, wherever the Agency maintains regulatory authority for the use of radioactive materials.
- 11. The licensee shall comply with the provisions of Ettle 12, Chapter 1, Arizona Administrative Code; Article 3, Licensing of Radioactive Materials; Article 4, "Standards for Protection Against Radiation"; and Article 10, "Notices, Histractions and Reports to Ionizing Radiation Workers: Inspections".

FORT IN ADDOCADANCE WITH 5 15-7-1002

#### ARIZONA RABIATION REGULATORY AGENCY

# RADIOACTIVE MATERIAL LICENSE

License Number: 13-032 Amendment Number: 2

- A. Radioactive material shall be used by, or under the supervision of, individuals who have successfully completed the equipment manufacturers' radiation safety and equipment operation course or other courses with similar content and requirements that have been approved by the Agency.
  - B. The Radiation Safety Officer shall maintain records listing those individuals who have received the approved training and are qualified to use or supervise the use of radioactive materials.
  - C The Radiation Safety Officer for this program is. Christopher Graff
- 13 A. This license does not authorize the licensee to store a nuclear gauge of home locations over night.
  - B The licensee shall not allow gauge users to leave gauges unattended during breaks or meal periods.
  - C. The licensee shall ensure that all gauges are stored in the licensee's facility, and locked in the transport vehicle in accordance with procedures approved by the Agency before leaving all job sites or entering a public access toadway. Gauges that are not under visual copirol shall be secured from unauthorized removal.
- 14 The licensee is not authorized to provide initial training to individuals to qualify them to be gauge users.
- 15 The licensee may transport radioactive material or deliver material to a carrier for transport in accordance with the provisions of Title 12, Chapter 1, Article 15.
- 16. For purposes of ending the principal ectivities authorized under this radioactive material license:
  - A. The license stays in effect beyond the license expiration date. Beyond the expiration date the license shall store radioactive material only, until the Agency authorizes its use by license arrendment, or the Agency notifies the licensee in writing that the license is terminated.
  - B. The licensec shall ensure the functions of decommissioning of facilities where principal activities are conducted under this license in accordance with Agency requirements.
  - C. The licensec shall continue to control public access into restricted areas and pay the annual licensing fee until the license is terminated.
- 17 Except as specifically provided otherwise by this license, the licensee shall possess and use the radioactive material described in Items 6, 7 and 8 of this license in accordance with the statements, representations and procedures contained in:
  - Application dated May 8, 2015, signed by Chris Graff.

#### 9. Authorized Use:

- A. For use in Troxler Model 4640 Series portable thin layer gauging devices for measuring physical properties of materials.
- B. and C. For use in Humboldt Scientific, Inc. Model 5001 portable gauging devices for measuring physical properties of materials.
- D. and E. For use in Troxler Model 3440 Series portable gauging devices for measuring physical properties of materials.

#### CONDITIONS:

- 10. Licensed material may be used or stored at the licensee's facilities located at:
  - A. 3820 Morrison Avenue, Bismarck, North Dakota.
  - B. 4458 3<sup>rd</sup> Avenue West, Dickinson, North Dakota.
  - C. Temporary job sites of the licensee anywhere in the state of North Dakota, except in areas of exclusive federal jurisdiction. You must obtain reciprocity to work outside of North Dakota or in areas of exclusive federal jurisdiction.

If the jurisdiction status of a federal facility within an Agreement State is unknown, the licensee should contact the federal agency controlling the job site in question to determine whether the proposed job site is an area of exclusive federal jurisdiction. Authorization for use of radioactive materials at job sites in Agreement States under exclusive federal jurisdiction shall be obtained from the U.S. Nuclear Regulatory Commission.

11. A. The licensee shall comply with the following chapters of the North Dakota Radiological Health Rules:

Chapter 33-10-01	General Provisions
Chapter 33-10-03.1	Licensing of Radioactive Material
Chapter 33-10-04.2	Standards for Protection Against Radiation
Chapter 33-10-10.1	Notices, Instructions and Reports to Workers - Inspections
Chapter 33-10-11	Fees for Issuance of License and Registration Certificates and Inspections
Chapter 33-10-13.1	Transportation of Radioactive Material

B. The licensee shall comply with all State and Federal environmental regulations. Issuance of this license does not supersede, replace, or negate any ordinances, codes, rules, or regulations. In

addition, the licensee shall comply with all local fire, zoning, and other applicable ordinances, codes, rules, and regulations as they affect the safe use and storage of radioactive material.

- 12. A. Licensed material shall be used by individuals who have attended the device manufacturer's training course or any other training course approved by this Department for gauge users; have been instructed in the licensee's operating and emergency procedures; and who have been designated by the licensee's Radiation Safety Officer. Copies of the certificate of training for each user shall be maintained by the licensee.
  - B. The Radiation Safety Officer (RSO) for this license is Mark Redlin.
- 13. A. Sealed sources shall be tested for leakage and/or contamination at intervals not to exceed the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State.
  - B. In the absence of a certificate from a transferor indicating that a leak test has been made within the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State, prior to the transfer, a sealed source received from another person shall not be put into use until tested and the test results received.
  - C. The leak test shall be capable of detecting the presence of 185 becquerels (0.005 microcurie) of radioactive material on the test sample. The test sample shall be taken from the scaled source or from the surfaces of the device in which the sealed source is permanently mounted or stored on which one might expect contamination to accumulate.
  - D. If the test reveals the presence of 185 becquerels (0.005 microcurie) or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repaired or to be disposed of in accordance with Department regulations. A report shall be filed within 5 days of the test with the Director, Division of Air Quality, North Dakota Department of Health, Gold Seal Center, 918 E Divide Avenue, 2<sup>nd</sup> Floor, Bismarck, North Dakota, 58501-1947, describing the equipment involved, the test results, and the corrective action taken.
  - E. Tests for leakage and/or contamination, limited to leak test sample collection, shall be performed by the licensee or by other persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services. The licensee is not authorized to perform the analysis; analysis of leak test samples must be performed by persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.
  - F. Sealed sources need not be tested if they are in storage and not being used. However, when they are removed from storage for use or transferred to another person, and have not been tested

within the required leak test interval, they shall be tested before use or transfer. No sealed source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.

- G. Records of leak test results shall be kept in units of becquerels or microcuries and maintained for 3 years.
- 14. Sealed sources or source rods containing licensed material shall not be opened or sources removed or detached from source rods or gauges by the licensee.
- 15. The licensee shall conduct a physical inventory every six (6) months to account for all sealed sources and/or devices received and possessed under the license. The records of the inventories shall be maintained for 5 years from the date of each inventory, and shall include the radionuclides, quantities, manufacturer's name and model numbers, location, and the date of the inventory.
- 16. Each portable nuclear gauge shall have a lock or outer locked container designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. The gauge or its container must be locked when in transport, storage, or when not under the direct surveillance of an authorized user.
- 17. Except for maintaining labeling as required by North Dakota Radiological Health Rules Chapters 33-10-04.2 and 33-10-13.1, the licensee shall obtain authorization from the Department and the U.S. Nuclear Regulatory Commission before making any changes in the sealed source, device, or source-device combination that would alter the description or specifications as indicated in the respective Certificates of Registration issued either by the U.S. Nuclear Regulatory Commission pursuant to 10 CFR 32.210 or by an Agreement State.
- 18. Any cleaning, maintenance, or repair of the gauges that requires detaching the source or source rod from the gauge shall be performed only by the manufacturer or other persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.
- 19. A. If the licensee uses unshielded sealed sources extended more than 3 feet below the surface, the licensee shall use surface casing that extends from the lowest depth to 12 inches above the surface and other appropriate procedures to reduce the probability of the source or probe becoming lodged below the surface. If it is not feasible to extend the casing 12 inches above the surface, the licensee shall implement procedures to ensure that the cased hole is free of obstruction before making measurements.
  - B. If a sealed source or a probe containing sealed sources becomes lodged below the surface and it becomes apparent that efforts to recover the sealed source or probe may not be successful, the licensee shall notify the Department and submit the report required by North Dakota Radiological Health Rules Chapter 33-10-03.1 [10 CFR 30.50]. The licensee shall not abandon the sealed source or probe without obtaining the Department's prior written consent.

- 20. Except as specifically provided otherwise by this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The North Dakota Radiological Health Rules shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the North Dakota Radiological Health Rules.
  - A. Application dated June 30, 2013.
  - B. Amendment letter dated July 1, 2016.
