Dear Mr. Hanson:

On August 26, 2016, the U.S. Nuclear Regulatory Commission (NRC) completed a security related Problem Identification and Resolution (PI&R) inspection at the Limerick Generating Station. The inspection covered one or more of the key attributes of the security cornerstone of the NRC's Reactor Oversight Process. The enclosed inspection report documents the inspection results, which were discussed on August 26, 2016, with Mr. Daniel Gaffney, Cyber Security Manager, and other members of your staff.

The inspection examined activities conducted under your license as they relate to safety and compliance with the Commission's rules and regulations, and with the conditions of your license. The inspector reviewed selected procedures and records, observed activities, and interviewed station personnel.

Based on the results of this inspection, no findings were identified.
