---

Dear Ms. Montgomery,

The answer to RAI 59.a should read:

Receptor A is an AFRRRI reactor staff member and a radiation worker.

Receptor B is an AFRRRI staff member but not necessarily a reactor staff member but would be a radiation worker.

Receptor C is an AFRRRI staff member. For the purposes of this calculation, an AFRRRI staff member would be considered to be a member of the public, but would under direct supervision of the licensee.

I apologize for the confusion.

Stephen Miller
