DATE OF ISSUANCE

U.S. NUCLEAR REGULATORY COMMISSION  
EXPORT LICENSE

Conditions

License Number XU-8376

- Condition 1** — Licensee shall file with the Customs Officer or the Postmaster two copies, in addition to those otherwise required, of the Shipper's Export Declaration covering each export and mark one of such copies for transmittal to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. The following declaration should accompany or be placed on the Shipper's Export Declarations for such exports:
- "This shipment is being made pursuant to specific license number (**specific license number**) filed at (**location of Customs office where license is filed**), on (**date license was filed**). This license expires on (**expiration date of license**), and the unshipped balance remaining on this license is sufficient to cover the shipment described on this declaration."
- Condition 2** — Exports authorized in any country or destination, except Country Groups Q, S, W, X, Y, and Z in Part 370, Supplement No. 1, of the Comprehensive Export Schedule of the U.S. Department of Commerce.
- Condition 3** — This license covers only the nuclear content of the material.
- Condition 4** — The material to be exported under this license shall be shipped in accordance with the physical protection requirements for special nuclear material in 10 CFR 73.
- Condition 5** — Special nuclear material authorized for export under this license shall not be transported outside the United States in passenger-carrying aircraft in shipments exceeding (1) 20 grams or 20 curies, whichever is less, of plutonium or uranium 233, or (2) 350 grams of uranium 235.
- Condition 6** — This license authorizes export only and does not authorize the receipt, physical possession, or use of the nuclear material.
- Condition 7** — The licensee shall complete and submit an NRC Form 741 for each shipment of source material exported under this license.
- Condition 8** — The licensee shall advise the NRC in the event there is any change in the designation of the company who will package the nuclear material to be exported under this license, or any change in the location of the packaging operation, at least three weeks prior to the scheduled date of export.
- Condition 9** - Exemption for Source Material (Non-nuclear use)  
Pursuant to 10 CFR 40.14(a), the uranium to be exported is exempt from the requirements in 10 CFR 40.33(a) that it be exported pursuant to an agreement for cooperation. The Commission has determined that this exemption is authorized by law and will not endanger the common defense and security and is otherwise in the public interest.

EXPORT/IMPORT  
AND  
INTERNAT'L SFGDRS

Dear Mr. Guhin:

This letter is in response to your request of April 29, 1977, for Executive Branch views on whether issuance of an export license in accordance with the application hereinafter described would be inimical to the common defense and security of the United States and whether the proposed export would fall within the scope of an Agreement for Cooperation pursuant to Section 123 of the Atomic Energy Act of 1954, as amended:

NRC No. S-682--J. T. Baker Chemical Company's application dated April 19, 1977, for authorization to export to Mexico 6.74 pounds of uranium contained in 12 pounds of uranyl acetate which will be used as a precipitant of sodium, in the processing/manufacturing of dry copying inks, and as an activator in bacteriological oxidation processes.

Under the authority granted by 10 CFR 40.14(a), we recommend that this supply of normal uranium be exempted from the requirement that it be exported pursuant to an agreement for cooperation.

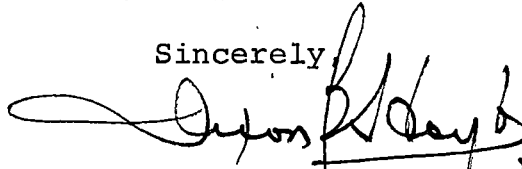

The eight factors listed in the NRC Congressional Briefing on Export Licensing have been reviewed for applicability to this export and it is the view of the Executive Branch, on the basis of this review, that the issuance of the license would not be inimical to the common defense and security of the United States. A detailed

7-26-77 copy to  
PDR & ACC

analysis of each factor is believed unnecessary in this case because of the small quantity of material involved and its non-nuclear end use.

On the basis of the foregoing, the Executive Branch believes the license should be issued.

Sincerely,

A handwritten signature in cursive script, appearing to read "Dixon B. Hoyle". The signature is written in black ink and is positioned above the typed name.

Dear Mr. Hoyle:

Enclosed please find an application from J. T. Baker Chemical Company for a license to export source material to Mexico.

Before taking action on this license application, we would appreciate your views, in accordance with established procedures and from the overall perspective of the Executive Branch, as to whether the issuance of the requested license would be inimical to the interests of the United States, including the common defense and security, and whether the export would fall within an Agreement for Cooperation.

Sincerely,

Original signed by

## Instructions

The export of byproduct, source or special nuclear material is prohibited unless the exporter holds a specific AEC export license or, with respect to byproduct and source material, unless the exporter is authorized under a general AEC export license as provided in AEC regulations 10 CFR Parts 36 and 40. APPLICATION FOR A SPECIFIC AEC EXPORT LICENSE SHOULD BE FILED IN TRIPLICATE ON THIS FORM AEC-7.

Specific or general AEC export licenses cover only the byproduct, source or special nuclear material involved in the export. If such material is contained in instruments or devices, a license may also be required from the Department of Commerce covering the export of such instruments or devices.

Item 8(a) - State the amount of byproduct material in millicuries or curies (state which unit is used). State the weight of contained thorium and uranium in pounds or kilograms (state which unit is used) and the net weight of the shipment (for example, 10 pounds thorium contained in 250 pounds thorium magnesium alloy). State the weight of contained special nuclear material in parts or multiples of grams.

Item 8(c) - If the requirements of 10 CFR Part 71 ("Packaging of Radioactive Material for Transport") are not applicable to the packaging and transport of the byproduct, source or special nuclear material to be exported, or if the packaging and transport of such material is subject to a general license or is exempt from the provisions of 10 CFR Part 71, so indicate. Identify where applicable the specific AEC license and date of issuance authorizing, pursuant to 10 CFR Part 71, the delivery of such material to a carrier for transport. If a specific AEC license or an amendment to an existing license is required by 10 CFR Part 71 in connection with the packaging and transport of the material proposed to be exported, an application containing the information specified in 10 CFR § 71.21 should be submitted with Form AEC-7.

Item 9 - For special nuclear material, a statement of end use from the consignee must accompany this application.
