FROM: Gary Langlie, Licensing Officer */RA P. Habighorst for/*  
Export Controls and Nonproliferation Branch  
Office of International Programs

SUBJECT: SENSITIVITY OF INFORMATION REGARDING  
EXPORT/IMPORT LICENSING ACTIONS IN ACCORDANCE  
WITH REGULATORY ISSUE SUMMARY 2005-31

The Export Controls & Nonproliferation Branch (ECNP) proposes to notify our commercial export applicants to withhold information from the public, under the provisions of 10 CFR 2.390, on authorized quantities or actual inventories of radionuclides, above the thresholds found in Table 1, Appendix P 10 CFR Part 110, Category 1 and 2 Radioactive Material, mixed oxide materials, and enriched uranium above 6% U-235. The U.S. Nuclear Regulatory Commission (NRC) would release information identifying the radionuclides and form. For quantities above the thresholds found in Table 1, Appendix P to 10 CFR 110, Category 1 and 2, mixed oxide materials, and enriched uranium above 6% U-235, continue to withhold information on projected or actual shipment schedules, delivery dates, date required, mode of transport, storage arrangements, or any other related logistical information provided by the licensee in the application or added by the NRC. If an applicant does not withhold this type of information the NRC will withhold it on the issued license. The controls described above are consistent with domestic licensing of source, byproduct, and special nuclear material.

The general principle is that the NRC should withhold information that would be useful to an adversary seeking to steal or sabotage material and use it malevolently to expose people to radiation and thus endanger the lives or physical security of individuals.

CONTACT: Gary Langlie, OIP/ECNP  
301-287-9076

The RIS 2005-31 would be communicated to all export applicants subject to the appropriate threshold levels mentioned above by October 31, 2016.

Enclosure:

NRC RIS 2005-31, "Control of Security  
-Related Sensitive Unclassified  
Non-Safeguards Information Handled by  
Individuals, Firms, and Entities Subject to  
NRC Regulation of the Use of Source,  
Byproduct, and Special Nuclear Material

The RIS 2005-31 would be communicated to all export applicants subject to the appropriate threshold levels mentioned above by October 31, 2016.
