1.0   Purpose and Scope

This document includes the master configuration list for HFC-SBC04A qualification system. The list contains the quantity, model number, name/description, I/O count, part number and software version. During the burn-in test, a separate Excel spreadsheet file is used for keeping track of all burn-in records including serial number of the cards, burn-in start time and end-time and any associated quality. After the completion of the burn-in test, the Excel spreadsheet data shall be included as an attachment to this file.
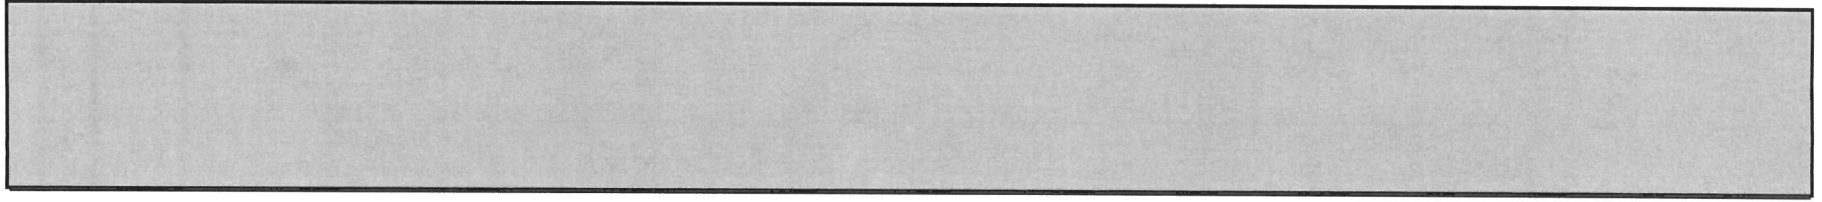

The V&V Group and the Development Engineering Group shall be responsible for maintaining this document.

2.0   The Master Configuration List

Table 1 shows the master configuration list of the required components for HFC-SBC04A system.
