Southern Nuclear Operating Company
Vogtle Electric Generating Plant Unit 3
ITAAC Closure Notification on Completion of ITAAC 2.3.07.02a [Index Number 392]

Ladies and Gentlemen:

In accordance with 10 CFR 52.99(c)(1), the purpose of this letter is to notify the Nuclear Regulatory Commission (NRC) of the completion of Vogtle Electric Generating Plant (VEGP) Unit 3 Inspections, Tests, Analyses, and Acceptance Criteria (ITAAC) Item 2.3.07.02a [Index Number 392] for verification that the American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code (BPVC) Section III design reports exist for the as-built components identified in VEGP Unit 3 Combined License (COL) Appendix C, Table 2.3.7-1 as ASME Code Section III for the Spent Fuel Pool Cooling System (SFS). The closure process for this ITAAC is based on the guidance described in NEI 08-01, "Industry Guideline for the ITAAC Closure Process under 10 CFR Part 52," which was endorsed by the NRC in Regulatory Guide 1.215.

This letter contains no new NRC regulatory commitments. Southern Nuclear Operating Company (SNC) requests NRC staff confirmation of this determination and publication of the required notice in the Federal Register per 10 CFR 52.99.

If there are any questions, please contact David Woods at 706-848-6903.

Respectfully submitted,

Michael J. Yox
Regulatory Affairs/Director Vogtle 3&4

Enclosure: Vogtle Electric Generating Plant (VEGP) Unit 3
Completion of ITAAC 2.3.07.02a [Index Number 392]

ITAAC Statement

Design Commitment:

- 2.a) The components identified in Table 2.3.7-1 as ASME Code Section III are designed and constructed in accordance with ASME Code Section III requirements.

Inspections/Tests/Analyses

Inspection will be conducted of the as-built components as documented in the ASME design reports.

Acceptance Criteria

The ASME Code Section III design reports exist for the as-built components identified in Table 2.3.7-1 as ASME Code Section III.

ITAAC Determination Basis

An inspection was conducted of the as-built components as documented in the American Society of Mechanical Engineers (ASME) design reports to demonstrate that the as-built components (equipment) identified in Combined License (COL) Appendix C, Table 2.3.7-1 (Attachment A) as ASME Code Section III (Reference 1) are designed and constructed in accordance with the ASME Code Section III requirements.

The ASME Code Design Reports referenced in the design report compilations (References 2-12) document that the components listed in Attachment A were designed and constructed in accordance with ASME Code Section III requirements. The Design Reports and fabrication documents were inspected to confirm that the design report was in compliance with the design specification and ASME Code Section III. An inspection was performed at a location separate from the plant site in accordance with the provisions of the ASME Code Section III as described in NEI 08-01, Section 9.4 (Reference 13).

The ASME Section III Code Design Reports for the as-built components identified in Attachment A exist and meet the ITAAC acceptance criteria.

ITAAC Finding Review

In accordance with plant procedures for ITAAC completion, Southern Nuclear Operating Company (SNC) performed a review of all ITAAC findings pertaining to the subject ITAAC and associated corrective actions. This review found that there are no relevant ITAAC findings associated with this ITAAC. The ITAAC completion review document number is included in the Vogtle Unit 3 ITAAC Completion Package for ITAAC 2.3.07.02a (Reference 14) and available for NRC inspection.

ITAAC Completion Statement

Based on the above information, SNC hereby notifies the NRC that ITAAC 2.3.07.02a was performed for VEGP Unit 3 and that the prescribed acceptance criteria are met.

Systems, structures, and components verified as part of this ITAAC are being maintained in their as-designed, ITAAC compliant condition in accordance with approved plant programs and procedures.
