General Comment

These are the reasons I support the sale of the Fitzpatrick power plant to exelon

Jobs, Economy and Environment

More than 600 direct jobs

Opportunities for 1,000 building tradesmen and skilled workers who are involved in refueling, maintenance and plant outages

\$500 million per year in regional economic activity

More than \$70 million in annual payroll

Enough carbon-free electricity to power more than 800,000 homes

Avoidance of more than 3 million tons of CO2 emissions annually, which represents about 10% of the carbon savings for all of New York

838 megawatt nuclear plant that provides reliable energy 24/7 and is a significant base load and dependable source needed for economic development progress and stability.

From a company that supports quality safe reliable power plants. Exelon is also community oriented and supporting.
