General Comment

I am in favor of the transfer of JAF NPP's license from Entergy to Exelon. Continued operation of the Fitzpatrick Nuclear facility will ensure:

- More than 600 direct jobs are saved
- Opportunities for 1,000 building tradesmen and skilled workers who are involved in refueling, maintenance and plant outages will remain
- \$500 million per year in regional economic activity will continue
- More than \$70 million in annual payroll is maintained
- Continued generation of carbon-free electricity to power more than 800,000 homes
- Avoidance of more than 3 million tons of CO2 emissions annually, which represents about 10% of the carbon savings for all of New York
- Continued operation of a 838 megawatt nuclear plant that provides reliable energy 24/7 and is a significant base load and dependable source needed for economic development progress and stability
