DUKE POWER

October 2, 1990

U. S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, D.C. 20555

Subject: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287
Inspection Report 50-269, -270, -287/89-05
Violation 89-05-02

Gentlemen:

By letter dated April 13, 1989, my response to Violation 89-05-02 identified by Inspection Report 50-269, -270, and 287/89-05 was transmitted to you as required by 10 CFR 2.201.

The subject violation concerned failure to follow procedures due to deficiencies in the CMD NSM Training and Qualification Program. In my response to the NRC, I committed to having full qualification of all NSM workers by December 1990.

At the time of the original response, the average time anticipated for training each NSM worker was six or seven weeks; the average time is now anticipated to be fourteen weeks. Also, because some workers are lacking sufficient skills and attending classes during or after work hours to develop them and the total number of workers identified to perform modification work has increased to 200. I am requesting that the training completion date be extended to December 1992.

Very truly yours,

Hal B. Tucker
