SUBJECT: LICENCE AMENDMENT REQUEST FOR UPDATE TO MAILING AND
PHYSICAL ADDRESS ONLY

Dear Mr. Blickwedel:

By letter dated April 17, 2012, the United Nuclear Corporation (UNC), a subsidiary of General Electric, submitted to the U.S. Nuclear Regulatory Commission (NRC) an application to amend Source Material License SUA-1475 for the former Church Rock Mill Site (the Mill Site) (See Agencywide Document Access and Management System (ADAMS) Accession Number ML12150A146). Specifically, UNC requests to amend License Conditions 2 and 10 to reflect the advent of Rural Addressing and to change its mailing address.

In accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) Part 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS. ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

The changes requested are administrative in nature and (i) there is no significant change in the types or significant increase in the amounts of any effluents that may be released offsite, (ii) there is no significant increase in individual or cumulative occupational radiation exposure, (iii) there is no significant construction impact, and (iv) there is no significant increase in the potential for or consequences from radiological accidents. This action is thus within a category of actions which the NRC has previously determined to have no significant impacts on the environment and have been categorically excluded from the requirement to prepare an EA or EIS under 10 CFR 51.22(c)(11). Therefore, neither an environmental assessment nor an environmental impact statement has been prepared for this action.

R. Blickwedel
