

## Facility Post Exam Comment and NRC Resolution

### Question # 73

(NRC note: This question dealt with the station's response to a security threat, and consequently has not been reproduced below in its original detail. The nature of Hope Creek staff's challenge to the question has also been summarized to avoid compromising the sensitive nature of the question.)

The main control room has been notified by security of an imminent security threat.

Which of the following is the correct location for the RO2 to go and the time limit to get there within?

- |    | <u>Location</u> | <u>Time Limit</u> |
|----|-----------------|-------------------|
| A. | {redacted}      | {redacted}        |
| B. | {redacted}      | {redacted}        |
| C. | {redacted}      | {redacted}        |
| D. | {redacted}      | {redacted}        |

**Comment:** The proposed correct answer given in the key was "B". The reference for this question is a security related procedure. The procedure was referenced post exam and it was found that the location described in "B" was wrong. With no correct location and time limit to be chosen by the applicant there is no correct answer to the question.

**NRC Resolution:** The facility comment is accepted. The location described in choice "B" is incorrect. Therefore, the question does not have a correct answer and has been deleted from the exam. The answer key has been changed to reflect this revision.
