LISLE, IL 60532-4352

OCT 25 2016

Laura T. Smith, M.S.
Radiation Safety Officer
Bronson Methodist Hospital
601 John Street
Kalamazoo, MI 49007

Dear Ms. Smith:

Enclosed is Amendment No. 66 to your NRC Material License No. 21-13125-01 in accordance with your requests dated August 2, 2016 (ML16218A420) and August 4, 2016 (ML16223A952). Changes made to your license are printed in **bold** font. Please review the enclosed license amendment document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9892 so that we may provide appropriate corrections and answers.

Please note that, in accordance your August 4, 2016 letter, the enclosed amendment has authorized Jonathan Olsen, M.D. for the use of yttrium-90 SIR-spheres microspheres, as permitted by Title 10 of the *Code of Federal Regulations* Section 35.1000. That authorization is conditioned on Dr. Olsen's completion of at least 3 in vivo SIR-sphere administrations, while under the supervision of a manufacturer representative or an Authorized User (AU). You will need to notify us promptly, in writing, after the cases have been completed, including the date(s) on which cases were complete including the name of the supervising individual. With this information, we can issue an administrative amendment to your NRC license to reflect the updated training, if necessary. Please contact me at (630) 829-9892, or by e-mail at sara.forster@nrc.gov if you have any questions regarding this letter.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with Title 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

Enclosure 1 to this letter contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

L. Smith

- 2 -

In accordance with Title 10 CFR 2.390, a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of NRC's ADAMS, which is accessible from the NRC website at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Sara A. Forster, M.S., Health Physicist
Materials Licensing Branch
Division of Nuclear Materials Safety
