Docket 70-7016
SNM-2019

SUBJECT: GLOBAL LASER ENRICHMENT PROGRAM CYBER SECURITY PLANS

GE Hitachi Global Laser Enrichment, LLC (GLE) hereby submits GLEP-00053-R, Revision 2, *Program Cyber Security Plan Annual Continuous Monitoring Report – GLE Engineering and Industrial Controls Environments*. This document, included as attachment 1 of this letter, represents the annual continuous monitoring report as required by NRC in accordance with DOE requirements as the Authorizing Official and GLE authorization to operate letter of November 2, 2014 (ML 14307B095).

Although no deficiencies were noted in the security control families deemed critical by the DOE Authorizing Official (AO), one minor procedure change was noted in control CA-6: Control references WI-28-106-17; this procedure still refers to DAA instead of AO. The procedure change is captured in our corrective action system. This annual review includes a review and validation for all the critical controls and an assessment of one-third of the non-critical controls, which are different from last year. The new controls are noted within the GLEP-00053-R Revision 2 document with red lines.

Please contact me at (910)819-7447, if you have any questions, or would like to discuss this submittal.
