License No. 47-31223-01
Docket No. 03037413
Control No. 592119

PLEASE CONFIRM RECEIPT OF THIS REQUEST FOR ADDITIONAL INFORMATION BY RETURN EMAIL

Dear Ms. Long;

This is in reference to your letter dated October 11, 2016, requesting to amend NRC License No. 47-31223-01 to change the Radiation Safety Officer and remove two authorized users. In order to continue our review of your request additional information is necessary.

1. Your application should have been signed by a management representative rather than an individual designated Administration, with no printed name. Please submit a letter signed by a management representative indicating that management has reviewed the application and concurs in the statements and representations contained therein. Note also that a management representative should sign all future correspondence that requests a change in your license.
2. It appears from your letter that a possible change of ownership (control) has occurred. Licensees must provide full information and obtain NRC's **prior written consent** before transferring control of the license. Control of a license is in the hands of the person or persons who are empowered to decide when and how that license will be used. That control is to be found in the person or persons who, because of ownership or authority explicitly delegated by the owners, possess the power to determine corporate policy and thus the direction of the activities under the license. A transferee is an entity that proposes to purchase or otherwise gain control of an NRC-licensed operation. A transferor is an NRC licensee selling or otherwise giving up control of a licensed operation. Provide the following information concerning changes of control by the applicant (transferor and/or transferee, as appropriate). If any items are not applicable, so state.
 - a. Provide a complete description of the transaction (transfer of stocks or assets, or merger).
 - b. Indicate whether the name has changed and include the new name. Include the name and telephone number of a licensee contact who NRC may contact if more information is needed.
 - c. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for any new personnel.
 - d. Describe any changes in the organization, location, facilities, equipment or procedures that relate to the licensed program.
 - e. Describe the status of the surveillance program (surveys, wipe tests, quality control) at the present time and the expected status at the time that control is to be transferred.
 - f. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.

- g. Confirm that the transferee will abide by all constraints, conditions, requirements and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.

We will continue our review upon receipt of the requested information. Please contact Robert Gallagher at (610) 337-5182 with any questions.

Regards,

Robert L. Gallagher
