Gentlemen:

SUBJECT: APPENDIX I TECHNICAL SPECIFICATIONS  
(DIABLO CANYON NUCLEAR POWER PLANT, UNITS 1 AND 2)

In order to provide reasonable assurance that the requirements of 10 CFR 50 Appendix I are implemented at all nuclear power facilities, the NRC staff has prepared the enclosed Appendix I model Technical Specifications. These model specifications are intended to provide guidance in the scope and types of required specifications for each facility in the areas of equipment and administrative requirements including actions we consider appropriate if a limiting condition for operation cannot be met.

The enclosure uses the Standard Technical Specification format with blanks or parentheses appearing where the information is plant specific.

We request that you submit proposed Appendix I Technical Specifications, utilizing the guidance provided in Enclosure 2, within the number of days indicated for your facility given in Enclosure 1. A staggered submittal schedule has been selected to facilitate staff review.

If you have any questions on this matter, please contact us.

Sincerely,

D. B. Vassallo, Assistant Director  
for Light Water Reactors  
Division of Project Management
