Re: Docket No. 50-275-OL
Docket No. 50-323-OL

Dear Sir:

Enclosed in support of our application for an operating license for Units 1 and 2 at the Diablo Canyon Site are 7 copies of the following:

"A Discussion of the Application of the Migration Process to Western Geophysical Company Seismic Reflection Line W74-12 in the Vicinity of the Hosgri Fault Zone, in the Area Offshore from the Diablo Canyon Power Plant Site."

This material responds in part to Item 2.22 of the request for additional information transmitted with the Nuclear Regulatory Commission's letter dated November 14, 1975.

The enclosures contain proprietary geologic data, and it is requested that they be withheld from public disclosure pursuant to 10 CFR 2.790. This data was developed at considerable expense by original research work performed by Western Geophysical Company. It is of the type that this Company customarily maintains in confidence and withholds from public disclosure. The release of this proprietary data would grant competitors access to the information without incurring any expense.

Kindly acknowledge receipt of the above material on the enclosed copy of this letter and return it to me in the enclosed addressed envelope.

Very truly yours,

Philip A. Crane, Jr.
