Re: Docket Nos. 50-275-OL
50-323-OL

Dear Mr. DeYoung:

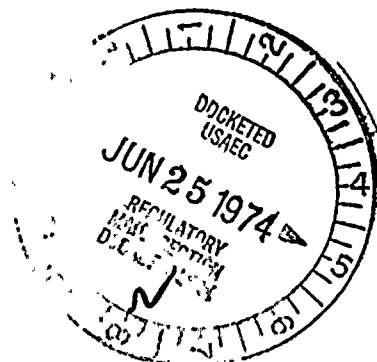

Your letter dated March 20, 1974, described certain problems with Bergen-Patterson hydraulic shock suppressors (snubbers) in other nuclear plants, and required certain actions of us if Bergen-Patterson snubbers were installed on safety related systems in the Diablo Canyon Plant.

Diablo Canyon Units 1 and 2 do not use Bergen-Patterson snubbers in safety related systems. The hydraulic snubbers to be used on safety related systems are supplied by Paul-Munroe Hydraulics, Inc. and by ITT Grinnell Corporation. Requirements for periodic surveillance of hydraulic snubbers installed on safety related systems will be incorporated in the Technical Specifications. The specific inspection requirements will be developed in the course of Technical Specification review and revision, which are expected to begin shortly.

This letter confirms information previously submitted to you by telephone.

Very truly yours,

F. T. Searls
