Docket Nos. 50-275
and 50-323

PRELIMINARY GEOLOGIC INFORMATION ON THE DIABLO CANYON SITE

In response to a specific request from the staff, the following preliminary information on Diablo Canyon site geology has been submitted by PG&E:

1. Boring logs based on field work on the slope east of the plant;
2. Three (3) maps of geologic cross sections of the above mentioned slope;
3. Seven (7) maps of the exposed geologic conditions of this slope;
4. Laboratory test data for this slope.
