Mr. Marcus A. Rowden
Chairman
Nuclear Regulatory
Commission
Washington, D.C. 20555

Dear Mr. Rowden:

Enclosed is a copy of a recent communication from one of my constituents. The matters addressed in the letter appear to fall within the purview of the Nuclear Regulatory Commission.

I would therefore appreciate your reviewing the contents of the letter and advising me of your conclusions in the matter.

Thank you for your assistance.

Sincerely,

JOHN KREBS
Member of Congress

FOR IMMEDIATE RELEASE

The Board of Directors of the Fresno County and City Chamber of Commerce passed the following resolution today, for distribution to all interested parties in California.

California is threatened with the most serious electrical power shortage in its history because of an unprecedented shortage of water for hydroelectric generation, and because government agencies are standing in the way of completion of nuclear power generation.

We feel the people of California have been generous with their patience during the seemingly endless deliberations over this issue, we have gotten dangerously close to a critical shortage of electrical power because of them, and we call for a decision, now, on whether or not we are to benefit from the advantages of this all but completed new source of energy.

Specifically, we refer to completion of the Diablo Canyon Nuclear Power Project, which could save Californians from serious power shortage hardships later this year, but could sit idle during an emergency if government agencies continue their indecision.

We are witnessing millions of Americans suffering power shortage hardships in the Eastern United States, hundreds of thousands unemployed, fuel costs soaring, essential services curtailed, schools closed and dozens of communities declaring emergency situations, while we head for some of the same problems this year, because we won't let our energy providers finish the job they have started.

We want the Diablo Canyon Nuclear Power Plant put into service as soon as possible.
