Ms. Helen M. Serinka
319 Los Pijos Way
San Jose, CA 95119

Dear Ms. Serinka:

Thank you for your recent letter addressed to the Commissioners regarding the necessity of licensing Unit 1 at the Diablo Canyon Nuclear Power Station for operation.

The Nuclear Regulatory Commission staff and the independent Advisory Committee on Reactor Safeguards are working to resolve questions which have been raised about the ability of the facility to withstand earthquakes.

When this question is resolved, the Atomic Safety and Licensing Board will resume the public hearing on Pacific Gas and Electric Company's application to operate the facility. At this time, it is not possible to predict when a final decision will be reached.

In the meantime, we are taking the liberty of forwarding a copy of your letter for inclusion in the Diablo Canyon file so that all parties to the proceeding will be aware of your views.

Sincerely,

Frank Ingram
Assistant to the Director
Office of Public Affairs

Remarks: Original to Docket. Logged Ex Parte
Cys to: GC, OCA, EDO, Secy.

For the Commission: _____

*Send three (3) copies of reply to Secy Mail Facility

1

1. The first part of the document
 discusses the general principles
 of the system. It covers the
 basic concepts and the overall
 structure of the project.

2. The second part of the document
 describes the implementation details.
 It includes the design of the
 components and the integration
 of the system.

3. The third part of the document
 presents the results of the
 experiments. It shows the
 performance of the system and
 compares it with other methods.

4. The fourth part of the document
 discusses the conclusions and
 future work. It summarizes the
 findings and suggests directions
 for further research.

M. K. C.
Commissioners

Dear Sirs,

I am appalled to see a news release of three women, calling themselves "Citizens against Vallecitos". It is my understanding Vallecitos deals with peaceful uses of nuclear energy. What can I do to help Vallecitos receive its license that has expired?

II. My second concern is Diablo Canyon. If Nuclear Power Plants, why can't it secure an interim license for startup? We need energy!! Our drought will need nuclear power to provide fresh water possibly to arid agriculture areas, if it becomes extended. Nuclear power can recover valuable minerals, three desalination of seawater, pure drinking water can be separated from areas of valuable mineral salts.
- May I hear from you?
Helen M. Perin
