Re: Dockets 50-275, 50-323
Diablo Canyon, Units 1 & 2

Dear Mr. Giambusso:

Your letter dated December 18, 1972, requested that we analyze the consequences of postulated pipe ruptures outside the containment for the Diablo Canyon units. Our letter dated December 28, 1972, stated our plans for performing this analysis.

Nuclear Services Corporation is performing the required analysis under contract. Enclosed are six copies of a report prepared by Nuclear Services Corporation entitled "Criteria for Evaluation of Effects of Postulated Piping Break Outside Containment for Diablo Canyon, Unit 1." This report summarizes work done in the first phase of the analysis and gives criteria being used for its completion.

Since we are now filing FSAR materials in support of our operating license application, we plan to submit subsequent reports and any design modifications that may be needed as amendments to the Diablo Canyon FSAR.

Very truly yours,

F. T. Searls
