Re: Docket Nos. 50-275-OL  
50-323-OL

Dear Mr. Parr:

Your letter dated June 13, 1975 requested information concerning the consideration of secondary system fluid flow instability in the Diablo Canyon design. We have considered such instability and have modified steam generator feedwater piping to preclude damage from this source. We expect to submit information in each of the six specific areas listed in the enclosure to your letter by August 1, 1975.

Very truly yours,

*Philip A. Crane, Jr.*
