

Docket Nos. 50-275 ← and 50-323

DEC 12 1973

Mr. John J. Forster
503 Mitchell Street
San Luis Obispo, California 93401

Dear Mr. Forster:

You and Mr. Lonnie Valentine of San Luis Obispo have filed a request on behalf of the Ecology Action Club of California Polytechnic State University to intervene in the public hearing to be held in connection with the application of Pacific Gas and Electric Company for licenses to operate the Diablo Canyon Nuclear Plant, Units 1 and 2. It is our policy to meet with members of the public who may have concerns regarding the proposed construction or operation of nuclear power plants to elicit information as to the nature of the concerns, such that the radiological safety and environmental impact reviews conducted by the Regulatory staff can be responsive to these concerns. Such meetings also provide an opportunity for staff members to discuss the licensing process and to answer questions regarding the proposed facility.

Mr. Tom Hiron of our staff has contacted you by telephone to arrange for a meeting, and I understand that December 18, 1973, is a convenient date for you. Accordingly, this is to confirm that Mr. Hiron and other members of the Regulatory staff will be in San Luis Obispo on December 18 to meet with you and other potential intervenors. The meeting will be held starting at 9:00 a.m. in the San Luis Obispo Veterans Memorial Building, Grand and Palm Streets.

1. The first step in the process of the development of a new product is the identification of a market need. This is often done through market research, which can involve surveys, focus groups, and other methods of gathering information from potential customers.

2. Once a market need has been identified, the next step is to develop a concept for the new product. This involves creating a detailed description of the product, including its features, benefits, and target market.

3. The third step is to conduct a feasibility study. This is a thorough analysis of the product concept, taking into account factors such as the cost of production, the potential for profitability, and the competitive landscape.

4. If the feasibility study is positive, the next step is to develop a business plan. This document outlines the company's strategy for launching and marketing the new product, as well as its financial projections.

5. The final step in the process is to launch the product. This involves manufacturing the product, distributing it to retailers or directly to customers, and promoting it through various marketing channels.

Docket Nos. 50-275
and 50-323

Mr. John J. Forster
503 Mitchell Street
San Luis Obispo, California 93401

Dear Mr. Forster:

You and Mr. Lonnie Valentine of San Luis Obispo have filed a request on behalf of the Ecology Action Club of California Polytechnic State University to intervene in the public hearing to be held in connection with the application of Pacific Gas and Electric Company for licenses to operate the Diablo Canyon Nuclear Plant, Units 1 and 2. It is our policy to meet with members of the public who may have concerns regarding the proposed construction or operation of nuclear power plants to elicit information as to the nature of the concerns, such that the radiological safety and environmental impact reviews conducted by the Regulatory staff can be responsive to these concerns. Such meetings also provide an opportunity for staff members to discuss the licensing process and to answer questions regarding the proposed facility.

An Atomic Safety and Licensing Board has been appointed to rule on the petitions to intervene for the Diablo Canyon application. It is probable that a special prehearing conference will be scheduled within the next few weeks to consider the results of the Board's deliberations. It is desirable that we meet with you before that time. In the case of an operating license application, a hearing is not mandatory and is held only if petitions to intervene are admitted by the Board.

Mr. Tom Hiron of our staff has contacted you by telephone to arrange for a meeting, and I understand that December 18, 1973, is a convenient date for you. Accordingly, this is to confirm that Mr. Hiron and other members of the Regulatory staff will be in San Luis Obispo on

Figure 1. The effect of the concentration of the *Agrobacterium* suspension on the transformation efficiency of *Agrobacterium* strains. The *Agrobacterium* strains were incubated in the presence of 100 mg/ml of gentamicin and 100 mg/ml of rifampicin. The concentration of the *Agrobacterium* suspension was 10⁶ cells/ml. The transformation efficiency was determined by the number of transformants per 10⁶ cells. The data are the mean ± SD of three independent experiments.

$\frac{d}{dt} \left(\frac{\partial L}{\partial \dot{x}} \right) = \frac{\partial L}{\partial x}$

[illegible][illegible]

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

Mr. John J. Forster
